Don't Have a Disk Drive?

1. Download and install Virtual clone drive (<http://www.slysoft.com/en/virtual-clonedrive.html>)
2. Download and the ISO Image from Dreamspark
3. Mount the ISO Image using Virtual Clone Drive.

This video covers it..

https://www.youtube.com/watch?v=s_fGSz1-HHs

What virtual clone drive does is mimics a DVD drive and allows you to mount an ISO image which is what you need to install the software from Dreamspark.

Installation

- When the disk is done burning, it will eject automatically.
- Reinsert the disk, it should start the install automatically.
- If it does not start, access the cd using Windows Explorer and click on the startup filer on the cd.
- Follow the installation prompts.
